About Industry Training

In 2012, the TEC funded 32 Industry Training Organisations (ITOs) through the Industry Training Fund and Modern Apprenticeships Scheme. As a result of mergers throughout the year, there were 20 funded ITOs at the close of 2012.

ITOs do not provide training themselves, but act as brokers between employers and training providers. ITOs range in size from an ITO that covers a single industry to large ITOs that cover multiple industries.

Many of the industries that ITOs represent have long established trades and apprenticeship models with an associated history and culture of regulated training, while other ITOs represent industries where the culture of training is still developing.

Government expectations of Industry Training

The Government expects ITOs to:

- enable working people to complete nationally recognised qualifications;
- create clear pathways towards advanced trade qualifications at levels four and above; and
- build and maintain strong support from the industries they serve.

To give effect to these expectations, ITOs have three statutory functions which are to:

- set skill standards for their industry;
- develop arrangements for the delivery of training; and
- provide leadership within their industry on skill and training needs.

Tertiary Education Strategy

The Tertiary Education Strategy 2010-2015 sets out the Government's expectations and priorities for New Zealand's tertiary education system, and calls for better performance from the tertiary education sector, as well as raising achievement for all learners under 25 years of age, and for Māori and Pacific learners.

Context

Number of Trainees:	130,679
Number of STMs*:	42,824

Trainee ethnicity+		Level of study	
European	67%	Levels 1-2	34%
Māori	17%	Levels 3-4	61%
Pacific	7%	Levels 5 and above	5%
Other	12%		

*Standard Training Measure - an STM is a unit of training, specifically the amount of training required to achieve 120 credits.

+Total may exceed 100% as some trainees identify with more than one ethnicity.
