About Industry Training

In 2013, the TEC funded 20 Industry Training Organisations (ITOs) through the Industry Training Fund and Modern Apprenticeships Scheme. As a result of mergers throughout the year, there were 13 funded ITOs at the close of 2013.

ITOs do not provide training themselves, but act as brokers between employers and training providers. ITOs range in size from an ITO that covers a single industry to large ITOs that cover multiple industries.

Many of the industries that ITOs represent have long established trades and apprenticeship models with an associated history and culture of regulated training, while other ITOs represent industries where the culture of training is still developing.

Government expectations of Industry Training

The Government expects ITOs to:

- enable working people to complete nationally recognised qualifications;
- create clear pathways towards advanced trade qualifications at levels four and above; and
- build and maintain strong support from the industries they serve.

To give effect to these expectations, ITOs have three statutory functions which are to:

- set skill standards for their industry;
- develop arrangements for the delivery of training; and
- provide leadership within their industry on skill and training needs.

Tertiary Education Strategy

The Tertiary Education Strategy 2014-2019 sets out the Government's expectations and priorities for New Zealand's tertiary education system, ensuring that the skills people develop are well matched to labour market needs, as well as getting at-risk young people into a career, and boosting achievement of Māori and Pasifika learners.

Context

Number of Trainees:	129,307
Number of STMs*:	42,087
