

Quick Guide: My Performance App

This app allows you to explore all the single data return (SDR) data used to calculate educational performance indicators (EPIs). The app uses the new EPI methodology, which includes cohort-based qualification and first year retention as well as course completion and progression measures. The app will support engagement between the TEC and tertiary education organisations (TEOs) on performance improvement and make it easier for TEOs to check their data.

Examples of what you can discover

- Trends of performance over time.
- Identification of issues around parity.
- Ability to drill down to individual national student number (NSN).
- Identification of data accuracy issues for SDR reporting, EPI publication and for performance-linked funding.

Things to note

- EPIs are calculated as the overall rate and not the median.
- Latest submitted data will be used to calculate the EPIs. If you submit a SDR change that relates to EPIs, the data in the app will be refreshed overnight.
- Course completion uses the existing methodology, however, the same sources of funding are available as for the cohort-based qualification completion and first year retention indicators. Courses enrolled in non-formal qualifications and qualifications where we don't expect completions are excluded, as well as any courses that are Performance-Based Research Fund (PBRF) eligible.
- Progression from level 1-4 to higher levels are by default shown for Student Achievement Component sources of funding. However, this can be overridden by choosing any other source of funding from the filter.
- Provides a link to methodology and rules for calculating the EPIs.
- Note that the overall cohort-based qualification completion rate can be impacted by the proportion of part-time students at a provider. The rate may also not include completions where learners are enrolled in longer qualifications and does not reflect when learners transfer to another TEO before completing a qualification.
- Because of significant differences in how part-time students engage in and complete qualifications we show the volume and proportion of part-time versus full-time learners.
- Because students may change their course of study part-way through we show:
 - 1) For qualification completions - when students complete or progress to a lower or higher level qualification without completing a qualification at the same level that they initially enrolled in.
 - 2) For 1st year retention - when students complete a qualification or progress to a lower or higher level qualification without being retained at the same level after the year they enter the cohort.

My Performance App Sheets

See the next page for details on what each sheet offers:

- | | | |
|---|--|---|
| <ul style="list-style-type: none"> • Summary sheets including summary over time and parity summary • Qualification completion sheets including completions over time, by demographics, qualification and detail | <ul style="list-style-type: none"> • Course completion sheets including completions over time, by demographics, course and detail • Progression from levels 1-4 sheets including over time and by learner demographics | <ul style="list-style-type: none"> • Progression all level sheets including over time and by learner demographics • First year retention sheets including retention over time, by demographics and detail |
|---|--|---|

Data Definitions

Take a look at the data definitions sheet in the app for more information on the following fields:

- | | | |
|--|---|---|
| <ul style="list-style-type: none"> • Attendance type • Cohort group • Course NZSCED • Qualification NZSCED | <ul style="list-style-type: none"> • Course classification • Expected Completion year • Funding rate level • Funding source | <ul style="list-style-type: none"> • Part-time/full-time status • Qualification NZQF level • Reporting year • Threshold |

Quick Guide: My Performance App

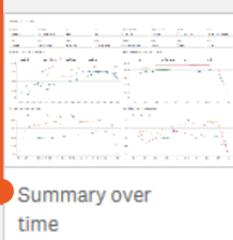

This app allows you to explore all the single data return (SDR) data used to calculate educational performance indicators (EPIs). The app uses the new EPI methodology, which includes cohort-based qualification and first year retention as well as course completion and progression measures. The app will support engagement between the TEC and tertiary education organisations (TEOs) on performance improvement and make it easier for TEOs to check their data.

Information provided by each sheet

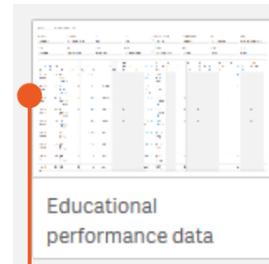

Provides information about the key indicators (qualification completion, first year retention, course completion and progression) by cohort-group and qualification NZQF level over time.

Provides information about the key indicators (qualification completion, first year retention, course completion and progression) by cohort-group and qualification NZQF level.

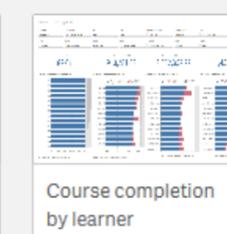

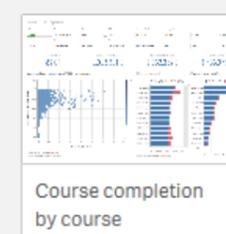

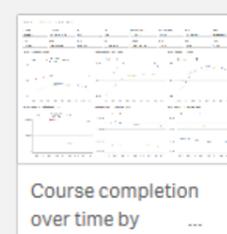

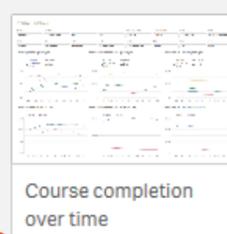

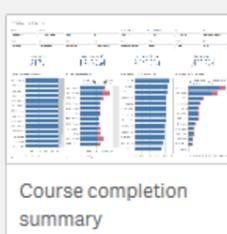

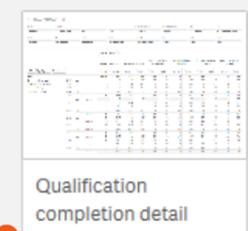

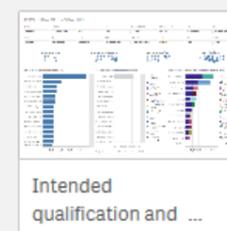

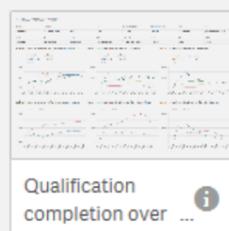

Provides information about the key indicators (qualification completion, first year retention, course completion and progression) by ethnicity over time.

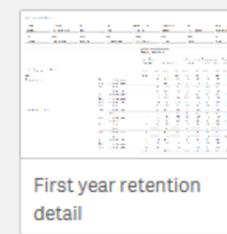

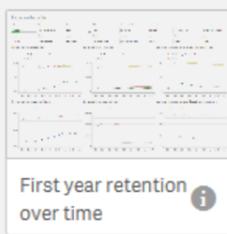

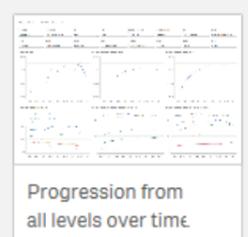

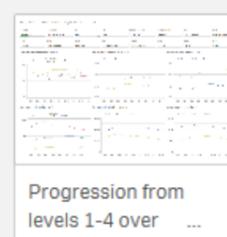

Provides information on individual NSN completions, progression and retention.

Qualification completion sheets provide information about qualification completion rates and learner outcomes by title, NZSCED, cohort groups, part-time/full-time status, ethnicity, age, gender and NZQF level.

Course completion sheets provide information about course completion rates and EFTS by title, NZSCED, NSN, cohort group, intended qualification, ethnicity, age, gender, attendance type and NZQF level.

Progression rate sheets provide information about progression rates and numbers of learners by title, NZSCED, cohort group, ethnicity, age, gender, and NZQF level.

First year retention sheets provide information about first year retention rates and numbers of learners by qualification title, NZSCED, cohort group, part-time/full-time status, ethnicity, age, and gender.
