

# Quick Guide

## Post-Study Outcomes at TEO Level App

This app allows you to take an in-depth look into recent data on employment outcomes and median earnings for people who completed a tertiary qualification in 2012/13, and 2015/16.

You use this app to explore information about the outcomes and earnings for people who studied at different tertiary education providers. This data can be filtered by level of study completed (Certificate, Diploma, Degree etc.) and by learner attributes including age, ethnicity, and gender.

This app is intended for use with the Post-Study Outcomes of Young Graduates App

### Examples of what you can discover

- Employment outcomes by TEO for people who completed a tertiary qualification one and three years before the 2015/2016 calendar years:
  - by age group, gender, ethnicity
  - by level of study

### Things to note

- The number of people completing tertiary qualifications is rounded according to Statistics New Zealand's rounding rules: numbers less are rounded to the nearest 3, numbers 20 to 100 are rounded to the nearest 5, numbers 100 to 1,000 are rounded to the nearest 10, and numbers above 1,000 are rounded to nearest 100.
- Graduates who were in receipt of a disability benefit or in corrections for any period within the outcome year are excluded from the data.
- The 'Number of Learners' group filter is designed to allow for exclusion of data with smaller numbers. There are three values: 'Under 50 graduates', '50-100 graduates', and 'Above 100 graduates'. Make sure you only have one value selected in the Demographics, Outcome year, NZQF level and Age group filters.
- One year outcomes are measured for completions from 2014 and 2015 and three year outcomes from completions in 2012 and 2013.

### Information provided by each sheet

Provides learner counts and percentage information for post-study outcome measures broken down by TEO and ethnicity, gender, age group or level of study

Provides learner counts and percentage information for post-study outcome measures broken down by TEO

Provides learner counts and percentage information for post-study outcome measures for learners broken down by highest school attainment, level of study and TEO

Provides learner counts and percentage information for post-study outcome measures broken down by completion year and ethnicity, gender, TEO type or level of study

### Data Definitions

Take a look at the data definitions sheet in the app for more information on the following fields:

- |                                 |                    |   |
|---------------------------------|--------------------|---|
| • Age group                     | • Employment rate  | • Level of study                        |
| • Highest achievement at school | • Job seeker rates | • Learners overseas or in further study |
